

Reinforced Overlays Used on Concrete Streets

GENERAL INFORMATION

Project Title: 2009 Street Resurfacing Projects
Owner: City of Beachwood
Engineer: GPD Associates
Location: Biscayne & Brentwood Ave.
Product Used: GlasPave 25 Hybrid Paving Mat
Quantity: 8,000 sq yd
Installed By: PS Construction Fabrics & Kokosing Construction
Install Date: July 20, 2009
Contact: City of Beachwood Engineering Department

BACKGROUND

Reason for product use:
Delay and control of reflective cracking when resurfacing over concrete streets.

PRODUCT DETAILS

Type:
New generation pavement interlayer providing high tensile strength and waterproofing. Goal is to double pavement service life and decrease maintenance costs by 50%.

Design Type:
Multi-course asphalt overlay with high strength pavement interlayer between courses.

RESULTS

Evaluation will take place each year after winter.
