CUTTING EDGE

COLD MIX

Service to the road patching industry

Our new company has one main guiding principle... to provide the highest level of service and quality to the road patching industry.

Integrity, experience and dedication

Our team has almost a half century of international experience in cold mixes along with high levels of service to all state DOT's across the U.S. This long track record of success in the cold mix industry allows us to give you the best in cold mix patching materials.

Who is Cutting Edge Cold Mixes?

Three partners make up Cutting Edge Cold Mixes.

Tom Letizia

Lifetime veteran of the cold mix industry. Tom helped found the high-performance cold mix industry since its inception in the 1960's.

Vic Meredith

President of Ohio's oldest, largest highway construction company, Vic and the Meredith family have served the highway industry in the Midwest for five decades.

Bill Schulz

Cold Mix Quality Control Director, presiding over the production of millions of tons of cold mixes internationally over several decades of service to state DOT maintenance departments across the United States.

What is the product?

Our product line is simple. We produce the highest quality cold mix patching material for all-weather application on all pavements. Here are our basic claims.

Cutting Edge Cold Mix

- All-weather application
- Easy to apply
- Permanent results
- Cost effective
- Long stockpile life

Whatever the location, climate conditions and aggregate type, we will produce the highest quality achievable for use by state, county, municipal and private users of cold mix for pothole repair.

Available throughout Ohio and the Midwest.

With just a phone call, you can have the best cold mix delivered to your location quickly.
